

Fenwal Phoenix Clean Agent Systems

Fenwal Protection Systems' Mission to Protect Critical Assets...

Fenwal® Protection Systems provides total fire protection for “mission critical” assets. In today’s global 24/7 environment, how long can your company afford to be off-line? In mission critical applications, end-to-end reliability is no longer an option, it is a requirement. Business cannot afford a fire. Not even a “minor” one.

Fire Protection for Today and Tomorrow

Fenwal Phoenix™ Clean Agent Systems are the premier choice for protecting your mission critical applications. The Phoenix system offers superior fire suppression that is clean, safe and environmentally friendly.

Fenwal Phoenix Clean Agent systems extinguish a fire quickly by breaking down the molecular structure of the fire. The suppression agent does not harm the equipment or personnel in the protected room or cause a mess to clean up afterwards.

Features:

- Minimal floor space required for cylinders
- Engineered for flexible design—which allows systems to be tailored to meet requirements of your facility
- Ideal for protection of multiple hazards
- Integrated system capabilities—add a FenwalNET 8000-ML and Fenwal detection for a complete “mission-critical” system

Whatever the installation, Fenwal Protection Systems has the product for your needs.

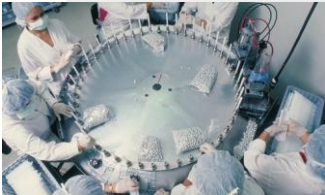

MISSION CRITICAL FIRE PROTECTION

Applications protected by Phoenix Clean Agent Systems:

The Fenwal Phoenix range of Clean Agent Systems protect areas large and small. Typical applications protected by our systems are:

- Telecommunication Facilities
- Internet Hosting Sites
- Health Care Facilities
- Control Rooms
- Clean Rooms
- Historical Artifacts

Why Choose a Fenwal Phoenix Clean Agent System...

Fast and Effective – Fenwal Phoenix Clean Agent Systems penetrate every nook and cranny of the protected area and extinguishes a fire in mere seconds.

Clean Fire Protection – The Fenwal Phoenix Clean Agent System minimizes fire-related down-time, leaving no residue to damage sensitive electronic equipment, vital software or irreplaceable objects.

Safe for People – The Fenwal Phoenix Clean Agent System is non-toxic when used in accordance with NFPA Standard 2001, it does not impair breathing or obscure vision—providing personnel added safety in an emergency situation.

Environmentally-Friendly - The Fenwal Phoenix Clean Agent suppressant has a zero Ozone Depletion Potential (OPD) and no Environmental Protection Agency usage restrictions.

Tested and Accepted – The Fenwal Phoenix Clean Agent System meets the standards of Underwriters’ Laboratories and Factory Mutual, it complies with the National Fire Protection Association Standard 2001, the U.S.EPA SNAP program and most global approval authorities.

The performance of Halon without the environmental impact – Fenwal Phoenix Clean Agent Systems combine active fire protection with the benefits of being people-safe and environmentally friendly.

Components of the *Mission Critical* Fire Protection System:

- Phoenix Clean Agent Suppression
- Conventional or Intelligent Control Unit
- Conventional or HSSD Smoke Detection
- Linear Heat Detection
- Notification Devices
- Manual Pull Stations
